

## AMED480T-GY

DIN Rail

The AMED480T-GY is a DIN-rail mounting AC/DC converter that features a cost-effective and energy efficient design. It accepts an ultra-wide input voltage range of 340-550VAC which is mainly supplied by a 3-phase distribution system and has an output voltage range from 24-48V. Measuring 85.50 x 129.00 x 125.00mm, ambient air-cooling vents both at the top and bottom of the converter improve its thermal performance. It is also easy to install and remove for maintenance, while efficiently organizing all your electrical cables.

This series offers great operating temperatures, from -30°C to 70°C and features an isolation of 4870VAC for improved reliability and system safety. Furthermore, a high MTBF of 1,000,000h, output short circuit protection (OSCP), output over-load protection (OLP), output over-voltage protection (OVP), and an over temperature protection (OTP) come standard with the series.

The AMED480T-GY is suitable for electric distribution boxes, grid power, instrumentation, CNC machines, industrial control panels and building automation applications.
