

CP6900-0001-0000 | "Economy" built-in Control Panel with DVI/USB Extended interface

The CP6900 "Economy" Control Panel expands the IPC entry-level class by a built-in Control Panel with DVI/USB extended interface. The panel is designed for installation in the front of a control cabinet and has a 10.1-inch touch screen display. Ideally combined with the compact Embedded PCs from the CX series or the C6xxx Industrial PCs, this results in an inexpensive PC/panel system. The CP6900 is supplied with a 24 V power supply. The integrated DVI/USB Extended technology enables remote panel operation at a distance of up to 50 m from the PC. The optional C9900-G07x push-button extensions supplement the Control Panel with an emergency stop key and three push-button keys with signal lamp.

CP6900	CP69xx-0001-0000	Drawings with dimensions
Features	10.1-inch TFT display, resolution 1024 x 600 WSVGA
