

SIMPLEX soft-face mallets • Plastic / superplastic; with cast iron housing and high-quality wooden handle

3067.060

Product Description

The SIMPLEX series 3067 comes with the insert combination of plastic / superplastic. The red plastic insert (series 3206) is hard and also oil and grease resistant. Composed of extruded and extremely homogeneous material, the superplastic insert (series 3207) is a medium hard plastic insert that is considerably more wear-resistant and durable. Made of cast iron, the housing comes with an integrated handle protection sleeve that provides for a high level of break resistance. Damping vibrations and shaped ergonomically, the high-quality wooden handle has a double coat of varnish in the grip area and is thus resistant to dirt. In line with the smart SIMPLEX principle, all components are replaceable and can be retrofitted. This translates to savings in both money and resources. This version is available in sizes ranging from D30mm to D60mm.
