

SIMPLEX soft-face mallets • Copper / superplastic; with reinforced cast iron housing and fibre-glass handle

3747.030

Product Description

The SIMPLEX series 3747 comprises the insert combination of copper / superplastic. Representing the hardest insert in the SIMPLEX selection, the copper insert (series 3804) produces extremely high impact forces but in a way that is gentler compared to a steel hammer. It is the replacement for a conventional copper hammer.

The superplastic insert (series 3207) is a medium hard plastic insert made of extruded and extremely homogeneous material. Compared to injection moulded plastic inserts, it is therefore considerably more wear-resistant and durable.

The black, reinforced cast steel housing provides for greater stability thanks to the enlarged wall thicknesses and struts. The increase in weight ensures greater impact force.

Extremely rugged and durable, the fibre glass handle offers exceptional break resistance. It is shaped ergonomically and includes a non-slip handle. It possesses a smooth surface and is inorganic (non-sensitive to moisture).

In line with the smart SIMPLEX principle, all components are replaceable and can be retrofitted.

This translates to savings in both money and resources.

This version is available in sizes D30mm and D40mm.

Product features:

- SIMPLEX soft-face mallet with the insert combination of superplastic (white, medium hard, very durable) / copper (hard).
- Reinforced cast steel housing with great stability boosts impact force by adding weight.
- Exceptionally rugged and durable fibre glass handle with non-slip grip, inorganic (non-sensitive to moisture).
- All parts can be replaced / retrofitted, resulting in great savings in cost and resources.
- Available in D30mm and D40mm.

Application Areas

Gardening and landscaping, paving, kerbstone setting, scaffold and tent construction, straightening work, plant construction, sheet-metal work, furniture assembly, window and door construction, prefabricated house construction, joiner's work, carpenter's work, assembly and repair work in the automotive and truck sector, fencing, driving steel wedges, manual wood harvesting with motor, maintenance and repair

Material

insert 1

- Copper with plastic socket
- hard

insert 2

- Superplastic, white
- Medium hard
- Very durable
- Wear-resistant

Housing

- Reinforced cast iron, black

Handle

- Fibreglass with rubber grip
