

# LF-GIF014YZ

GIF\*YZ SELV 1-driver with 7-output current | Constant Current Compact - Non dimmable

# **Product family features**

- Low THD<15% @full load
- Rated supply range: 220-240 VAC
- Ta range: -30 +50 °C
- Ripple current < 5%</p>
- Fixed output current (non dimmable)
- 5 years guarantee

# **Product family benefits**

- Output current adjustable via DIP switch with 7-shift
- Support built-in and independent use; high efficiency
- Comply with ZHAGA standard
- Flicker free; SELV output
- Long lifetime and high reliability
- Suitable for Class I/II light fixture

# Typical applications

- For panel light, downlight, spotlight
- For office, commercial, decorative and retail lighting, etc.

# **Product parameters**

- Output current 100/150/200/250/300/350/400mA
- Output power 0.9-14W
- Input voltage 198-264Vac

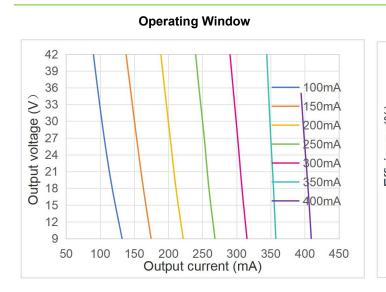

- Output voltage 9-42Vdc
- Efficiency 85%

Long strain-relief (Type-A)

# **Assembly diagram**

Independent assembly-1

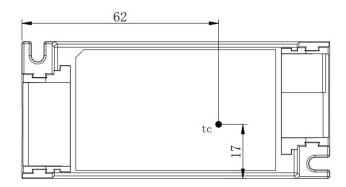

Independent assembly-2

Independent strain-relief assembly methods:

- 1. Independent type 1 adds a short strain-relief for input and output respectively.
- 2. Independent type 2 adds a Type A strain-relief for input and a short strain-relief for output. The Type A strain-relief is equipped with input terminals (+/–) twice, which also supports 2.5mm<sup>2</sup> wire diameter.

# **Test equipment & condition**

Test Equipment	AC power source: CHROMA6530, digital power meter: CHROMA66205, oscilloscope: Tektronix DPO3014, DC electronic load: M9712B, LED board, constant
	temperature and humidity chamber, lightning surge generator: Everfine
	EMS61000-5B, rapid group pulse generator: Everfine EMS61000-4A,
	spectroanalyzer: KH3935, hi-pot tester: EEC SE7440, flicker tester (flicker-free
	coefficient test): Everfine LFA-3000, etc.

If there are no special remarks, the above parameters are tested at the ambient temperature of  $25^{\circ}$ C, humidity of 50%, full load and input voltage of 230Vac/50Hz.

### **Additional information**

- 1. It is recommended that user install the over voltage protection, under voltage protection and surge protection devices in the power supply circuits of light fixtures to ensure electricity safety.
- 2. The LED driver used in combination with the end device is one of the accessories of the whole light fixture, and the EMC of the whole light fixture is not only susceptible to the driver itself, but to the LED light fixture and the whole light fixture's wiring. Thus, the manufacturer of LED light fixture should re-confirm the EMC of the whole light fixture before the whole light fixture is finished.
  - 3. The test conditions of the circuit breaker configuration quantity are the same as those of the inrush current.
- 4. The PC cover, casing and end cap for assembling the LED driver in the light fixture must meet the fire rating of UL94-V0 or above.
  - 5. It is prohibited to be built into integrated track lights, integrated downlights, etc.

# **Transportation & storage**

Suitable transportation means: vehicles, boats and aeroplanes.

In transit, it is necessary to prepare awnings for rain or sun protection. Moreover, please keep civilized loading and unloading to prevent the vibration or impact of LED driver as much as possible.

The storage of LED driver shall conform to the standard of Class I environment. When using LED drivers which have been stored for more than 6 months, please re-test them firstly. Do not use them unless they are tested to be qualified.

### **Cautions**

Please use Lifud LED driver according to its parameters in the specification, otherwise the LED driver may malfunction.

Using any incompatible light fixtures or those that have not been certified may cause fire, explosion or other risks.

Man-made damage is beyond the scope of Lifud warranty service.
