Sensing range variations

0.5ms response time, high-speed detection

SA2E

Small objects moving at high speed were detected at intervals, but with SA2E, the response time is 0.5ms, allowing continuous detection of small objects at high speed.

Beam diameter enables accurate detection of various objects (BGS)

SA2E-B Background Suppression (BGS)

By reducing the light beam diameter by 30 to 40% compared to conventional photoelectric sensors, the accuracy of the detecting position is improved.

Air blower unit allows stable detection in dusty environment

SA2E

SA1E

SA1E-L

IDEA's unique air blower unit mounting bracket is available as an option. Maintains detection performance of the sensor and keeps the detection surface clean.

Designed to blow air over the entire lens at the optimum pressure

Operational at a temperature of -30 to 55°C

SA2E

Features operating temperature range of -30 to +55°C. Ideal for installation on equipment used in cold storage warehouses.

Output reverse-polarity protection circuit

SA2E

SA1E

In addition to reverse-polarity protection for the power voltage, an output reverse-polarity protection circuit is also built-in, to protect the sensor from damage in the event of incorrect wiring.

Example for NPN output

The built-in reverse-polarity protection diode prevents damage even if the wiring is incorrect.

Sensors available to suit a variety of workpieces

Background Suppression (BGS)

SA2E-B Background Suppression (BGS)

Ignores background and reliably detects workpieces. Not easily affected by the color of the workpiece and edges can be accurately detected by narrow beams. Detailed setting of distances is possible.

Coaxial Polarized Retro-reflective (Transparent object sensing)

SA1E-X Coaxial Polarized Retro-reflective Transparent Object Sensing)

Detects transparent objects of various shapes
Coaxial optical structure and narrow beam ensure stable detection; unaffected by narrowing, inclination or shaking of transparent objects.

Application examples of transparent object sensing

Because of its coaxial structure, SA1E-X does not have a blind zone, such as shown below. Other than detecting transparent objects, because the workpiece can be detected closely to the sensor, SA1E-X can be used in applications in narrow installation locations and where objects are near the sensor.

Mail sorting machine

Application examples

SA2E

SA1E

Through-beam

Automated parking garage

Polarized Retro-reflective

Detection of mirror surfaces

Diffuse-reflective

Restroom sink

Background Suppression (BGS)

Detecting PC board at inspections

Coaxial Polarized Retro-reflective (Transparent Object Sensing)

Detecting the end of a transparent film

Laser models ensure fast response and accurate sensing

SA1E-L

I Easy-to-align optical axis

IDEC's unique optical lens adjust function achieves easy and speedy optical adjustment when installing machines and equipment. Simple and accurate set up of long distance and small workpiece reading.

I Detects fast-moving objects

The fast 0.25ms response speed allows reliable detection of closely spaced objects on a fast-moving conveyor.

I Dust and water resistant

IP67 protection suitable for environments exposed to dust or water vapor.

I Easy positioning

Because the visible red laser is easily seen in both short (20mm) and long (30m) distances, the detecting position and optical axis can be seen at a glance. The small beam can detect small objects, and also enables easy positioning of the sensor in applications where the beam passes through narrow spaces. All models are Class 1 laser compliant (JIS, IEC, FDA).

Application examples

SA1E-L

Detection from narrow locations

Detection of narrow gaps between objects on high-speed lines

Long distance detection

Detection in dust or water vapor

Detection of small objects

Miniature Photoelectric Sensors (Built-in Amplifier)/Laser Model

See website for details on approvals and standards.

*1: Compliant with Class 1 of FDA regulations (21 CFR 1040.10 and 21 CFR 1040.11 according to Laser Notice No. 50).

*2: Cable length: 1m (55g when the cable length is 2m. 120g when the cable length is 5m.)

SA2E/SA1E/SA1E-L

Slit and Sensing Range (typical) [Through-beam SA1E-T□]

Slit		With Sensitivity Adjustment			
		Sensing Range (m)		Minimum Detectable Object Width (mm) (*1)	
Part No.	Slit Width: A (See P26.)	Attached on: Receiver	Attached on: Receiver/Projector	Attached on: Receiver	Attached on: Receiver/Projector
SA9Z-S06	0.5mm	2.5	1.0	0.5	0.5
SA9Z-S07	1.0mm	3.5	1.5	1.0	1.0
SA9Z-S08	2.0mm	6.0	3.5	2.0	2.0
SA9Z-S09	0.5mm	2.0	0.7	0.5	0.5
SA9Z-S10	1.0mm	3.0	1.5	1.0	1.0
SA9Z-S11	2.0mm	5.5	3.0	2.0	2.0
SA9Z-S12	0.5mm	0.8	0.08	0.5	0.5
SA9Z-S13	1.0mm	1.5	0.3	1.0	1.0
SA9Z-S14	2.0mm	2.5	1.2	2.0	2.0

*1: At 1mm from receiver surface.

- The slit can be snapped onto the front easily. (See the figure below.)

Horizontal slits and round slits have an orientation.
Make sure that the TOP marking comes on top of the sensor (LED side).

Slit and Sensing Range (typical) [Through-beam SA1E-LT□]

Slit		Sensing Range (m)	Minimum Detectable Object Width (mm)
Part No.	Slit Width: A	Used on receiver	Used on receiver
SA9Z-S12	0.5mm	6	1.1
SA9Z-S13	1.0mm	10	1.6
SA9Z-S14	2.0mm	22	2.5

- When slit is mounted only on the receiver (when mounting on one side).
- Minimum detectable object width (mm): when the object is at the intermediate point between the projector and receiver.

The slit can be snapped onto the front easily.

Accessories (SA2E/SA1E) (optional)

Slits (for through-beam)

When ordering, specify the Ordering No.

Item	Slit Size	Part No.	Ordering No.	Package Quantity
Vertical Slit	0.5mm × 18mm	SA9Z-S06	SA9Z-S06PN02	2
	1.0mm × 18mm	SA9Z-S07	SA9Z-S07PN02	
	2.0mm × 18mm	SA9Z-S08	SA9Z-S08PN02	
Horizontal Slit	0.5mm × 6.5mm	SA9Z-S09	SA9Z-S09PN02	
	1.0mm × 6.5mm	SA9Z-S10	SA9Z-S10PN02	
	2.0mm × 6.5mm	SA9Z-S11	SA9Z-S11PN02	
Round Slit	Ø0.5mm	SA9Z-S12	SA9Z-S12PN02	
	Ø1.0mm	SA9Z-S13	SA9Z-S13PN02	
	Ø2.0mm	SA9Z-S14	SA9Z-S14PN02	

Reflectors (for polarized retro-reflective)

Package Quantity: 1

Item	Part No. (Ordering No.)
Reflector	Standard IAC-R5
	Small IAC-R6
	Large IAC-R8
	Narrow (rear/side mounting) IAC-R7M
	Narrow (rear mounting) IAC-R7B
	Narrow (side mounting) IAC-R7S
	Tape Type (40 × 35mm) IAC-RS1
	Tape Type (80 × 70mm) IAC-RS2
Reflector Mounting Bracket	For IAC-R5 IAC-L2
	For IAC-R6 IAC-L3
	For IAC-R8 IAC-L5

* See P25 for dimensions.

- IAC-L2 is not supplied with mounting screws and nuts. Use commercially available M4 screws and nuts for mounting the IAC-R5 reflector.
- IAC-L3 is supplied with two mounting screws (M3 × 8mm sems screws).
- IAC-L5 is supplied with two mounting screws (M4 × 10mm sems screws).
- IAC-R7M and IAC-R7S are supplied with two M3 × 8mm self-tapping screws, two flat washers, and two spring washers. IAC-R7B is supplied with an M3 × 8mm self-tapping screw, a flat washer, and a spring washer.

Reflectors(used only for coaxial polarized retro-reflective)

Package Quantity: 1

Item	Part No. (Ordering No.)
Reflector	Standard IAC-R9
	Small IAC-R10
	Ultra-small IAC-R11
Reflector Mounting Bracket	For IAC-R9 IAC-L3

Mounting Brackets

Package Quantity: 1

Item	Part No. (Ordering No.)
Main Unit Mounting Bracket	Vertical Mounting SA9Z-K01
	Horizontal Mounting SA9Z-K02
	Cover type SA9Z-K03
	Back Mounting SA9Z-K04

- Two mounting screws (M3 × 12mm sems screws) are supplied with the SA9Z-K01 and SA9Z-K02. Two mounting screws (M3 × 14mm sems screws) are supplied with the SA9Z-K03.
- The through-beam model requires two mounting brackets, one each for the projector and the receiver.
- SA9Z-K02 cannot be used for the connector models.
- Contact IDEC for mounting brackets for the connector.

Connector Cable (for M8 connector model)

Package Quantity: 1

Number of Core Wires	Style & Length	Part No. (Ordering No.)
4	Straight, 2m	SA9Z-CM8K-4S2
	Straight, 5m	SA9Z-CM8K-4S5
	Right angle, 2m	SA9Z-CM8K-4L2
	Right angle, 5m	SA9Z-CM8K-4L5

Air Blower Mounting Block

Package Quantity: 1

Item	Part No. (Ordering No.)
Air Blower Mounting Block	SA9Z-A02

- Two mounting screws (M3 × 20mm sems screws), one M5 × 6mm screw for plugging the air supply port, and one gasket (0.5mm thick) are supplied.
The air tube fitting and mounting bracket are not supplied and must be ordered separately. (Recommended mounting bracket: SA9Z-K01)
- Material: Anodized aluminum surface

Sensitivity Control Screwdriver

Package Quantity: 1

Item	Part No. (Ordering No.)
Sensitivity Control Screwdriver 	SA9Z-AD01

Accessory Dimensions (SA2E/SA1E) (optional)

All dimensions in mm

Mounting Brackets

SA9Z-K01

(Material: Stainless)

With Mounting Bracket

- *1: Center of optical axis (through-beam)
*2: Center of optical axis (polarized retro-reflective, diffuse-reflective, spot-beam reflective models)

SA9Z-K02

(Material: Stainless)

With Mounting Bracket

- *1: Center of optical axis (through-beam)
*2: Center of optical axis (polarized retro-reflective, diffuse-reflective, spot-beam reflective models)

SA9Z-K03

SA9Z-S12 SA9Z-S13 SA9Z-S14

Material: Stainless Steel

Note: Dielectric strength when installed on the unit: 1000V AC (between live part and mounting bracket, except between live part and tightening ring)

Note: For slit width A, see P13.

Air Blower Mounting Block

SA9Z-A02

Air Blower Mounting Block

With Mounting Bracket

•The SA9Z-A02 air blower mounting block is supplied with two mounting screws (M3 × 20mm semi screws), one screw for plugging the air supply port (M5 × 6 mm), and one gasket for plugging the air supply port (1mm thick).

•An air tube fitting (M5) can be installed to either the top or side. Tighten the fitting to a torque of 0.5 N·m maximum.

•The air tube fitting and mounting bracket are not supplied and must be ordered separately. (Recommended mounting bracket: SA9Z-K01)

Material: Anodized aluminum surface

⚠ Safety Precautions

- Be sure to turn off the power before performing installation, removal, wiring, maintenance, or inspection work. Failure to do so could result in electric shock and fire.

Operating Instructions

Read the instruction manual carefully before performing installation, wiring, maintenance, and inspection work, and before operating this product. Be sure to use the product correctly.

For details about mounting methods, wiring, and maintenance, see the instruction manuals at the following URLs.

SA1E-T

Installation

- Do not install the sensors in areas subject to the following conditions. Otherwise malfunction and damage might occur.
 - 1) Inductive devices or heat sources
 - 2) Extreme vibration or shock
 - 3) Large amount of dust
 - 4) Harmful gases
 - 5) Water, oil, chemicals
 - 6) Outdoors
- Make sure to prevent sunlight, fluorescent light, and especially the fluorescent light of inverters from entering the receiver of the photoelectric switch directly. Keep the through-beam model receiver away from intense extraneous light.
- Interference prevention allows two photoelectric sensors to be mounted in close proximity. However, the through-beam model is not equipped with interference prevention. Maintain appropriate distance between the sensors referring to the lateral displacement characteristics.
- Because the photoelectric sensors are IP67 waterproof, the sensors can be exposed to water. However, wipe water drops and smears from the lens and slit using a soft cloth to make sure of the best detecting performance.
- Polycarbonate or acrylic resins are used for optical elements. Do not use ammonia or caustic soda for cleaning, otherwise the optical elements will be dissolved. To remove dust and moisture build-up, use a soft, dry cloth.
- Tighten the mounting screws (M3) to a torque of 0.5 N·m. Do not tighten the mounting screws excessively or hit the switch with a hammer, otherwise the protection degree cannot be maintained.

Product Information

USB Powered Portable Sensor Checker

SA1P

Easily connects 24V DC devices at any location. An external USB battery can be used enabling easy device testing and continuity check for 24V DC devices without power outlets near by. Connects to PCs using a USB connector.

Photoelectric Sensors

SA1U

Universal voltage types operate on 24-240V AC and 12-240V DC. DC power types operate on 12-24V DC. Four sensing methods (through-beam, polarized retro-reflective, diffuse-reflective, and background suppression).

Magnetic Proximity Sensors

DPRI

The DPRI magnetic proximity switch incorporates a sealed reed switch and four magnets inside a compact housing. This self-contained proximity switch requires no external power supply and can detect the presence of magnetic objects without contact.

Ordering Terms and Conditions

Thank you for using IDEC Products.

By purchasing products listed in our catalogs, datasheets, and the like (hereinafter referred to as "Catalogs") you agree to be bound by these terms and conditions. Please read and agree to the terms and conditions before placing your order.

1. Notes on contents of Catalogs

- (1) Rated values, performance values, and specification values of IDEC products listed in this Catalog are values acquired under respective conditions in independent testing, and do not guarantee values gained in combined conditions.
Also, durability varies depending on the usage environment and usage conditions.
- (2) Reference data and reference values listed in Catalogs are for reference purposes only, and do not guarantee that the product will always operate appropriately in that range.
- (3) The specifications / appearance and accessories of IDEC products listed in Catalogs are subject to change or termination of sales without notice, for improvement or other reasons.
- (4) The content of Catalogs is subject to change without notice.

2. Note on applications

- (1) If using IDEC products in combination with other products, confirm the applicable laws / regulations and standards.
Also, confirm that IDEC products are compatible with your systems, machines, devices, and the like by using under the actual conditions. IDEC shall bear no liability whatsoever regarding the compatibility with IDEC products.
- (2) The usage examples and application examples listed in Catalogs are for reference purposes only. Therefore, when introducing a product, confirm the performance and safety of the instruments, devices, and the like before use. Furthermore, regarding these examples, IDEC does not grant license to use IDEC products to you, and IDEC offers no warranties regarding the ownership of intellectual property rights or non-infringement upon the intellectual property rights of third parties.
- (3) When using IDEC products, be cautious when implementing the following.
 - i. Use of IDEC products with sufficient allowance for rating and performance
 - ii. Safety design, including redundant design and malfunction prevention design that prevents other danger and damage even in the event that an IDEC product fails
 - iii. Wiring and installation that ensures the IDEC product used in your system, machine, device, or the like can perform and function according to its specifications
- (4) Continuing to use an IDEC product even after the performance has deteriorated can result in abnormal heat, smoke, fires, and the like due to insulation deterioration or the like. Perform periodic maintenance for IDEC products and the systems, machines, devices, and the like in which they are used.
- (5) IDEC products are developed and manufactured as general-purpose products for general industrial products. They are not intended for use in the following applications, and in the event that you use an IDEC product for these applications, unless otherwise agreed upon between you and IDEC, IDEC shall provide no guarantees whatsoever regarding IDEC products.
 - i. Use in applications that require a high degree of safety, including nuclear power control equipment, transportation equipment (railroads / airplanes / ships / vehicles / vehicle instruments, etc.), equipment for use in outer space, elevating equipment, medical instruments, safety devices, or any other equipment, instruments, or the like that could endanger life or human health
 - ii. Use in applications that require a high degree of reliability, such as provision systems for gas / waterworks / electricity, etc., systems that operate continuously for 24 hours, and settlement systems
 - iii. Use in applications where the product may be handled or used deviating from the specifications or conditions / environment listed in the Catalogs, such as equipment used outdoors or applications in environments subject to chemical pollution or electromagnetic interference
If you would like to use IDEC products in the above applications, be sure to consult with an IDEC sales representative.

3. Inspections

We ask that you implement inspections for IDEC products you purchase without delay, as well as thoroughly keep in mind management/maintenance regarding handling of the product before and during the inspection.

4. Warranty

(1) Warranty period

The warranty period for IDEC products shall be one (1) year after purchase or delivery to the specified location. However, this shall not apply in cases where there is a different specification in the Catalogs or there is another agreement in place between you and IDEC.

(2) Warranty scope

Should a failure occur in an IDEC product during the above warranty period for reasons attributable to IDEC, then IDEC shall replace or repair that product, free of charge, at the purchase location / delivery location of the product, or an IDEC service base. However, failures caused by the following reasons shall be deemed outside the scope of this warranty.

- i. The product was handled or used deviating from the conditions / environment listed in the Catalogs
 - ii. The failure was caused by reasons other than an IDEC product
 - iii. Modification or repair was performed by a party other than IDEC
 - iv. The failure was caused by a software program of a party other than IDEC
 - v. The product was used outside of its original purpose
 - vi. Replacement of maintenance parts, installation of accessories, or the like was not performed properly in accordance with the user's manual and Catalogs
 - vii. The failure could not have been predicted with the scientific and technical standards at the time when the product was shipped from IDEC
 - viii. The failure was due to other causes not attributable to IDEC (including cases of force majeure such as natural disasters and other disasters)
- Furthermore, the warranty described here refers to a warranty on the IDEC product as a unit, and damages induced by the failure of an IDEC product are excluded from this warranty.

5. Limitation of liability

The warranty listed in this Agreement is the full and complete warranty for IDEC products, and IDEC shall bear no liability whatsoever regarding special damages, indirect damages, incidental damages, or passive damages that occurred due to an IDEC product.

6. Service scope

The prices of IDEC products do not include the cost of services, such as dispatching technicians. Therefore, separate fees are required in the following cases.

- (1) Instructions for installation / adjustment and accompaniment at test operation (including creating application software and testing operation, etc.)
- (2) Maintenance inspections, adjustments, and repairs
- (3) Technical instructions and technical training
- (4) Product tests or inspections specified by you

The above content assumes transactions and usage within your region. Please consult with an IDEC sales representative regarding transactions and usage outside of your region. Also, IDEC provides no guarantees whatsoever regarding IDEC products sold outside your region.
